# Traumatic Brain Injury (TBI)

Engage VR Rehab provide an experienced multidisciplinary team providing best practice therapy and use a range of state-of-the-art technologies to enhance recovery from a TBI.

## Why see ENGAGE VR

We work with you to identify the high priority health, physical and functional areas that we can assist you with.

Our programs focus on best practice management of acute, sub-acute and chronic traumatic brain injuries. Rehabilitation commonly has a focus on:

- Muscle strength and coordination.
- Mobility – including the use of walking aids such as canes or leg braces.
- Tone and range of motion in affected joints.
- Communication – regaining abilities with speech, reading and writing.
- Swallowing – regaining strength and coordination in muscles used for swallowing and implementing safe swallow strategies.
- Cognition, memory and mental health.

Our Occupational Therapy team can assist with equipment recommendations, home modifications, hand therapy and guidance with activities of daily living.

Our Speech Pathology team can assist with management of swallowing, speech and language skills.
